DOCK LIGHTING AND SIGNALING - INFORMATION

The W.L. Jenkins Company offers a complete line of dock lighting and signaling products comprised of quality material and workmanship. The W.L. Jenkins Company will continue to be a leader in the signaling area as we have for over 50 years.

Products Available Include:

- **Dock Lights** – all frames are constructed of high quality, 14 gauge steel tubing. The lamp heads are available in either metal or polycarbonate material with incandescent lamp or sodium lamp configuration
- **Stop & Go Light** – rugged polypropylene construction with easy to replace lamps

Dock Lights and Stop & Go Lights are available in a variety of configurations:

- **Single Struts DL** – adjustable, folding arm allows horizontal and vertical positioning
- **Double Strut DL** – double strut mounting arm provides greater strength
- **Adjustable Double Strut DSDL** – dual struts with knuckle joint for total adjustability
- **Lamp Heads** – metal or polycarbonate available for all models
- **Lamp** – available in high pressure sodium or incandescent lamp for all models

Selecting the Appropriate Dock Light System for Your Environment

- Area to be illuminated
- Number of docks per warehouse
- Light intensity required
- Type of cargo platforms to be unloaded
